***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-6 and 22 drawn to methods for associating a retailer item identifier with a manufacturer item identifier, classified in class 705, subclass 27.
  - II. Claims 7-10, drawn to searching for retailers which sell a second item, classified in class 705, subclass 27.
  - III. Claims 11-13, drawn to automatically pre-authorizing a purchase, classified in class 705, subclass 44.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as determining a manufacturer item identifier. Invention II has a separate utility such as searching for retailers which sell a second item. See MPEP § 806.05(d).
3. The inventions are distinct, each from the other because of the following reasons:

Inventions I and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention III has separate utility such as pre-authorizing a purchase of an item. Invention I has a separate utility such as determining a manufacturer identifier. See MPEP § 806.05(d).

4. The inventions are distinct, each from the other because of the following reasons: Inventions II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention III has separate utility such as pre-authorizing a purchase of an item. Invention II has a separate utility such as searching for a second item from a retailer. See MPEP § 806.05(d).

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

6. Since the examiner knows from past experience that an election will not be made by telephone, this restriction is proper under MPEP 812.01.
